These files contain the readable names as extracted from the microfilmed 1900 Federal Census page images for Steele County, Minnesota. The official date of the census was June 1, 1900. The census pages are all dated between June 1 and July 15. In addition to the SURNAME, Census Page, First Name and Age, I have added a Soundex Index corresponding to each SURNAME. An "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will read some of the text differently. The microfilm images are often of low quality. Over time the ink has absorbed into the paper yielding 'smeared' text. The aging of the paper results in darkening that makes text difficult to read. The tape used to repair tears microfilms as solid black.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. The penmanship of several of the census takers ranged from bad to very bad! (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct 'obvious' mistakes (spelling and other.) I tried to enter the information as it appears in the images. (Example: several census takers wrote their "o" such that it appears as an "a" or "u".) Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was unreadable.

 Total 16500 (h), (d)

The letters "A" & "B" are used to identify the front and back sides respectively of each numbered census page (image.)

- (a) pages 28 - 36 are indicated as the Village of Blooming Prairie.
- (b) page 42 is identified as the Village of Clinton Falls.
- (c) Up to 50 persons (at least 12 Surnames) are unavailable as a result of 1 missing page image.
- (d) Totals include the "missing" persons.
- (e) Up to 200 persons (at least 41 Surnames) are unavailable as a result of 4 missing page images.
- (f) Owatonna City Ward 3 includes 282 persons identified as living at the Orphan Home (pages 149 - 151.)
- (g) Some page images are sequenced incorrectly for Summit Township. I have corrected the affected family relationships.
- (h) 114 Persons have also been omitted from these listings because I was unable to determine a surname.

- Notes: 1. This composite shows entries from the 1880 - 1930
censuses and covers four generations of my family.
2. The <year> identification appears ONLY in this sample.
3. Notice the variety of spellings, names and nicknames.

Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

1. The SURNAME "Sister" is utilized to identify the Sisters at the Sacred Heart Convent.
2. Most persons listed on pages 149 - 151 are officially "inmates" at the State School for Indigent Children (the "Orphans Home").
3. The Soundex Index: This code helps to find SURNAMES that sound alike. One flaw is that it is based on "English" phonics (i.e., (French or Native American names might not conform.) Another problem occurs for "prefixed" names (other than Mc- and Mac-) since these names may be coded with or without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Soundex Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1900 Federal Census Records (images) is contained in a separate file.
6. Useless 'information' gleaned from the census pages:
 One household lists a wife and a mistress and many children.
 One household lists two wives - and many children.
 One listing indicates a woman as 'head of household' followed by entries for her husband and children.
 The entries for 'age' and birth 'month & year' often disagree!

=====

These files contain the readable names as extracted from the microfilmed 1900 Federal Census page images for Steele County, Minnesota. The official date of the census was June 1, 1900. The census pages are all dated between June 1 and July 15. In addition to the SURNAME, Census Page, First Name and Age, I have added a Soundex Index corresponding to each SURNAME. An "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will read some of the text differently. The microfilm images are often of low quality. Over time the ink has absorbed into the paper yielding 'smeared' text. The aging of the paper results in darkening that makes text difficult to read. The tape used to repair tears microfilms as solid black.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. The penmanship of several of the census takers ranged from bad to very bad! (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct 'obvious' mistakes (spelling and other.) I tried to enter the information as it appears in the images. (Example: several census takers wrote their "o" such that it appears as an "a" or "u".) Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was unreadable.

154 - 160	Owatonna Township	626
161 - 170	Somerset Township	908
171 - 178	Summit Township	799 (g)

Total 16500 (h), (d)

The letters "A" & "B" are used to identify the front and back sides respectively of each numbered census page (image.)

- (a) pages 28 - 36 are indicated as the Village of Blooming Prairie.
- (b) page 42 is identified as the Village of Clinton Falls.
- (c) Up to 50 persons (at least 12 Surnames) are unavailable as a result of 1 missing page image.
- (d) Totals include the "missing" persons.
- (e) Up to 200 persons (at least 41 Surnames) are unavailable as a result of 4 missing page images.
- (f) Owatonna City Ward 3 includes 282 persons identified as living at the Orphan Home (pages 149 - 151.)
- (g) Some page images are sequenced incorrectly for Summit Township. I have corrected the affected family relationships.
- (h) 114 Persons have also been omitted from these listings because I was unable to determine a surname.

- Notes: 1. This composite shows entries from the 1880 - 1930
censuses and covers four generations of my family.
2. The <year> identification appears ONLY in this sample.
3. Notice the variety of spellings, names and nicknames.

Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====
This format, called "Family Friendly", evolved as a way to maintain
some of the family relationship information from the census listings.
Each new entry in the "Surname" column results from any of the following
factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person
marked as "Head" of the household is named first. Others listed on the
same line, or continuing line(s), include those listed as wife, husband,
son, daughter, and others sharing the same surname. Sometimes family
members are not listed on the same page as the household "Head". This
causes the sort routine to generate a new line and "Surname" entry. I
have forced the routine to place these cases immediately following the
line containing the "Head" of the household. A review of the ages usually
suggests that this has happened.

This format fails to show family and household relationship
information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

1. The SURNAME "Sister" is utilized to identify the Sisters at the Sacred Heart Convent.
2. Most persons listed on pages 149 - 151 are officially "inmates" at the State School for Indigent Children (the "Orphans Home").
3. The Soundex Index: This code helps to find SURNAMES that sound alike. One flaw is that it is based on "English" phonics (i.e., (French or Native American names might not conform.) Another problem occurs for "prefixed" names (other than Mc- and Mac-) since these names may be coded with or without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Soundex Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1900 Federal Census Records (images) is contained in a separate file.
6. Useless 'information' gleaned from the census pages:
 - One household lists a wife and a mistress and many children.
 - One household lists two wives - and many children.
 - One listing indicates a woman as 'head of household' followed by entries for her husband and children.
 - The entries for 'age' and birth 'month & year' often disagree!

These files contain the readable names as extracted from the microfilmed 1900 Federal Census page images for Steele County, Minnesota. The official date of the census was June 1, 1900. The census pages are all dated between June 1 and July 15. In addition to the SURNAME, Census Page, First Name and Age, I have added a Soundex Index corresponding to each SURNAME. An "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will read some of the text differently. The microfilm images are often of low quality. Over time the ink has absorbed into the paper yielding 'smeared' text. The aging of the paper results in darkening that makes text difficult to read. The tape used to repair tears microfilms as solid black.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. The penmanship of several of the census takers ranged from bad to very bad! (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct 'obvious' mistakes (spelling and other.) I tried to enter the information as it appears in the images. (Example: several census takers wrote their "o" such that it appears as an "a" or "u".) Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was unreadable.

154 - 160	Owatonna Township	626
161 - 170	Somerset Township	908
171 - 178	Summit Township	799 (g)

Total 16500 (h), (d)

The letters "A" & "B" are used to identify the front and back sides respectively of each numbered census page (image.)

- (a) pages 28 - 36 are indicated as the Village of Blooming Prairie.
- (b) page 42 is identified as the Village of Clinton Falls.
- (c) Up to 50 persons (at least 12 Surnames) are unavailable as a result of 1 missing page image.
- (d) Totals include the "missing" persons.
- (e) Up to 200 persons (at least 41 Surnames) are unavailable as a result of 4 missing page images.
- (f) Owatonna City Ward 3 includes 282 persons identified as living at the Orphan Home (pages 149 - 151.)
- (g) Some page images are sequenced incorrectly for Summit Township. I have corrected the affected family relationships.
- (h) 114 Persons have also been omitted from these listings because I was unable to determine a surname.

- Notes: 1. This composite shows entries from the 1880 - 1930
censuses and covers four generations of my family.
2. The <year> identification appears ONLY in this sample.
3. Notice the variety of spellings, names and nicknames.

Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

1. The SURNAME "Sister" is utilized to identify the Sisters at the Sacred Heart Convent.
2. Most persons listed on pages 149 - 151 are officially "inmates" at the State School for Indigent Children (the "Orphans Home").
3. The Soundex Index: This code helps to find SURNAMENES that sound alike. One flaw is that it is based on "English" phonics (i.e., (French or Native American names might not conform.) Another problem occurs for "prefixed" names (other than Mc- and Mac-) since these names may be coded with or without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Soundex Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1900 Federal Census Records (images) is contained in a separate file.
6. Useless 'information' gleaned from the census pages:
 - One household lists a wife and a mistress and many children.
 - One household lists two wives - and many children.
 - One listing indicates a woman as 'head of household' followed by entries for her husband and children.
 - The entries for 'age' and birth 'month & year' often disagree!

These files contain the readable names as extracted from the microfilmed 1900 Federal Census page images for Steele County, Minnesota. The official date of the census was June 1, 1900. The census pages are all dated between June 1 and July 15. In addition to the SURNAME, Census Page, First Name and Age, I have added a Soundex Index corresponding to each SURNAME. An "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will read some of the text differently. The microfilm images are often of low quality. Over time the ink has absorbed into the paper yielding 'smeared' text. The aging of the paper results in darkening that makes text difficult to read. The tape used to repair tears microfilms as solid black.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. The penmanship of several of the census takers ranged from bad to very bad! (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct 'obvious' mistakes (spelling and other.) I tried to enter the information as it appears in the images. (Example: several census takers wrote their "o" such that it appears as an "a" or "u".) Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was unreadable.

161 - 170	Somerset Township	908
171 - 178	Summit Township	799 (g)

Total 16500 (h), (d)

The letters "A" & "B" are used to identify the front and back sides respectively of each numbered census page (image.)

- (a) pages 28 - 36 are indicated as the Village of Blooming Prairie.
- (b) page 42 is identified as the Village of Clinton Falls.
- (c) Up to 50 persons (at least 12 Surnames) are unavailable as a result of 1 missing page image.
- (d) Totals include the "missing" persons.
- (e) Up to 200 persons (at least 41 Surnames) are unavailable as a result of 4 missing page images.
- (f) Owatonna City Ward 3 includes 282 persons identified as living at the Orphan Home (pages 149 - 151.)
- (g) Some page images are sequenced incorrectly for Summit Township. I have corrected the affected family relationships.
- (h) 114 Persons have also been omitted from these listings because I was unable to determine a surname.

2. The <year> identification appears ONLY in this sample.
3. Notice the variety of spellings, names and nicknames.

Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

1. The SURNAME "Sister" is utilized to identify the Sisters at the Sacred Heart Convent.
2. Most persons listed on pages 149 - 151 are officially "inmates" at the State School for Indigent Children (the "Orphans Home").
3. The Soundex Index: This code helps to find SURNAMES that sound alike. One flaw is that it is based on "English" phonics (i.e., French or Native American names might not conform.) Another problem occurs for "prefixed" names (other than Mc- and Mac-) since these names may be coded with or without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Soundex Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1900 Federal Census Records (images) is contained in a separate file.
6. Useless 'information' gleaned from the census pages:
One household lists a wife and a mistress and many children.
One household lists two wives - and many children.
One listing indicates a woman as 'head of household' followed by entries for her husband and children.
The entries for 'age' and birth 'month & year' often disagree!

=====

These files contain the readable names as extracted from the microfilmed 1900 Federal Census page images for Steele County, Minnesota. The official date of the census was June 1, 1900. The census pages are all dated between June 1 and July 15. In addition to the SURNAME, Census Page, First Name and Age, I have added a Soundex Index corresponding to each SURNAME. An "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will read some of the text differently. The microfilm images are often of low quality. Over time the ink has absorbed into the paper yielding 'smeared' text. The aging of the paper results in darkening that makes text difficult to read. The tape used to repair tears microfilms as solid black.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. The penmanship of several of the census takers ranged from bad to very bad! (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct 'obvious' mistakes (spelling and other.) I tried to enter the information as it appears in the images. (Example: several census takers wrote their "o" such that it appears as an "a" or "u".) Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was unreadable.

The letters "A" & "B" are used to identify the front and back sides respectively of each numbered census page (image.)

- (a) pages 28 - 36 are indicated as the Village of Blooming Prairie.
- (b) page 42 is identified as the Village of Clinton Falls.
- (c) Up to 50 persons (at least 12 Surnames) are unavailable as a result of 1 missing page image.
- (d) Totals include the "missing" persons.
- (e) Up to 200 persons (at least 41 Surnames) are unavailable as a result of 4 missing page images.
- (f) Owatonna City Ward 3 includes 282 persons identified as living at the Orphan Home (pages 149 - 151.)
- (g) Some page images are sequenced incorrectly for Summit Township. I have corrected the affected family relationships.
- (h) 114 Persons have also been omitted from these listings because I was unable to determine a surname.

- Notes: 1. This composite shows entries from the 1880 - 1930 censuses and covers four generations of my family.
2. The <year> identification appears ONLY in this sample.
3. Notice the variety of spellings, names and nicknames.

Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====
This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

1. The SURNAME "Sister" is utilized to identify the Sisters at the Sacred Heart Convent.
2. Most persons listed on pages 149 - 151 are officially "inmates" at the State School for Indigent Children (the "Orphans Home").
3. The Soundex Index: This code helps to find SURNAMENES that sound alike. One flaw is that it is based on "English" phonics (i.e., (French or Native American names might not conform.) Another problem occurs for "prefixed" names (other than Mc- and Mac-) since these names may be coded with or without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Soundex Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1900 Federal Census Records (images) is contained in a separate file.
6. Useless 'information' gleaned from the census pages:
 One household lists a wife and a mistress and many children.
 One household lists two wives - and many children.
 One listing indicates a woman as 'head of household' followed by entries for her husband and children.
 The entries for 'age' and birth 'month & year' often disagree!

=====

These files contain the readable names as extracted from the microfilmed 1900 Federal Census page images for Steele County, Minnesota. The official date of the census was June 1, 1900. The census pages are all dated between June 1 and July 15. In addition to the SURNAME, Census Page, First Name and Age, I have added a Soundex Index corresponding to each SURNAME. An "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will read some of the text differently. The microfilm images are often of low quality. Over time the ink has absorbed into the paper yielding 'smeared' text. The aging of the paper results in darkening that makes text difficult to read. The tape used to repair tears microfilms as solid black.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. The penmanship of several of the census takers ranged from bad to very bad! (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct 'obvious' mistakes (spelling and other.) I tried to enter the information as it appears in the images. (Example: several census takers wrote their "o" such that it appears as an "a" or "u".) Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was unreadable.

171 - 178	Summit Township	799 (g)

Total 16500 (h), (d)

The letters "A" & "B" are used to identify the front and back sides respectively of each numbered census page (image.)

- (a) pages 28 - 36 are indicated as the Village of Blooming Prairie.
- (b) page 42 is identified as the Village of Clinton Falls.
- (c) Up to 50 persons (at least 12 Surnames) are unavailable as a result of 1 missing page image.
- (d) Totals include the "missing" persons.
- (e) Up to 200 persons (at least 41 Surnames) are unavailable as a result of 4 missing page images.
- (f) Owatonna City Ward 3 includes 282 persons identified as living at the Orphan Home (pages 149 - 151.)
- (g) Some page images are sequenced incorrectly for Summit Township. I have corrected the affected family relationships.
- (h) 114 Persons have also been omitted from these listings because I was unable to determine a surname.

- Notes: 1. This composite shows entries from the 1880 - 1930 censuses and covers four generations of my family.
2. The <year> identification appears ONLY in this sample.
3. Notice the variety of spellings, names and nicknames.

Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

1. The SURNAME "Sister" is utilized to identify the Sisters at the Sacred Heart Convent.
2. Most persons listed on pages 149 - 151 are officially "inmates" at the State School for Indigent Children (the "Orphans Home").
3. The Soundex Index: This code helps to find SURNAMES that sound alike. One flaw is that it is based on "English" phonics (i.e., (French or Native American names might not conform.) Another problem occurs for "prefixed" names (other than Mc- and Mac-) since these names may be coded with or without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Soundex Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1900 Federal Census Records (images) is contained in a separate file.
6. Useless 'information' gleaned from the census pages:
 - One household lists a wife and a mistress and many children.
 - One household lists two wives - and many children.
 - One listing indicates a woman as 'head of household' followed by entries for her husband and children.
 - The entries for 'age' and birth 'month & year' often disagree!

=====

These files contain the readable names as extracted from the microfilmed 1900 Federal Census page images for Steele County, Minnesota. The official date of the census was June 1, 1900. The census pages are all dated between June 1 and July 15. In addition to the SURNAME, Census Page, First Name and Age, I have added a Soundex Index corresponding to each SURNAME. An "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will read some of the text differently. The microfilm images are often of low quality. Over time the ink has absorbed into the paper yielding 'smeared' text. The aging of the paper results in darkening that makes text difficult to read. The tape used to repair tears microfilms as solid black.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. The penmanship of several of the census takers ranged from bad to very bad! (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct 'obvious' mistakes (spelling and other.) I tried to enter the information as it appears in the images. (Example: several census takers wrote their "o" such that it appears as an "a" or "u".) Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was unreadable.

 Total 16500 (h), (d)

The letters "A" & "B" are used to identify the front and back sides respectively of each numbered census page (image.)

- (a) pages 28 - 36 are indicated as the Village of Blooming Prairie.
- (b) page 42 is identified as the Village of Clinton Falls.
- (c) Up to 50 persons (at least 12 Surnames) are unavailable as a result of 1 missing page image.
- (d) Totals include the "missing" persons.
- (e) Up to 200 persons (at least 41 Surnames) are unavailable as a result of 4 missing page images.
- (f) Owatonna City Ward 3 includes 282 persons identified as living at the Orphan Home (pages 149 - 151.)
- (g) Some page images are sequenced incorrectly for Summit Township. I have corrected the affected family relationships.
- (h) 114 Persons have also been omitted from these listings because I was unable to determine a surname.

- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

1. The SURNAME "Sister" is utilized to identify the Sisters at the Sacred Heart Convent.
2. Most persons listed on pages 149 - 151 are officially "inmates" at the State School for Indigent Children (the "Orphans Home").
3. The Soundex Index: This code helps to find SURNAMES that sound alike. One flaw is that it is based on "English" phonics (i.e., (French or Native American names might not conform.) Another problem occurs for "prefixed" names (other than Mc- and Mac-) since these names may be coded with or without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Soundex Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1900 Federal Census Records (images) is contained in a separate file.
6. Useless 'information' gleaned from the census pages:
 - One household lists a wife and a mistress and many children.
 - One household lists two wives - and many children.
 - One listing indicates a woman as 'head of household' followed by entries for her husband and children.
 - The entries for 'age' and birth 'month & year' often disagree!

=====

These files contain the readable names as extracted from the microfilmed 1900 Federal Census page images for Steele County, Minnesota. The official date of the census was June 1, 1900. The census pages are all dated between June 1 and July 15. In addition to the SURNAME, Census Page, First Name and Age, I have added a Soundex Index corresponding to each SURNAME. An "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will read some of the text differently. The microfilm images are often of low quality. Over time the ink has absorbed into the paper yielding 'smeared' text. The aging of the paper results in darkening that makes text difficult to read. The tape used to repair tears microfilms as solid black.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. The penmanship of several of the census takers ranged from bad to very bad! (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct 'obvious' mistakes (spelling and other.) I tried to enter the information as it appears in the images. (Example: several census takers wrote their "o" such that it appears as an "a" or "u".) Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was unreadable.

 Total 16500 (h), (d)

The letters "A" & "B" are used to identify the front and back sides respectively of each numbered census page (image.)

- (a) pages 28 - 36 are indicated as the Village of Blooming Prairie.
- (b) page 42 is identified as the Village of Clinton Falls.
- (c) Up to 50 persons (at least 12 Surnames) are unavailable as a result of 1 missing page image.
- (d) Totals include the "missing" persons.
- (e) Up to 200 persons (at least 41 Surnames) are unavailable as a result of 4 missing page images.
- (f) Owatonna City Ward 3 includes 282 persons identified as living at the Orphan Home (pages 149 - 151.)
- (g) Some page images are sequenced incorrectly for Summit Township. I have corrected the affected family relationships.
- (h) 114 Persons have also been omitted from these listings because I was unable to determine a surname.

- Notes: 1. This composite shows entries from the 1880 - 1930
censuses and covers four generations of my family.
2. The <year> identification appears ONLY in this sample.
3. Notice the variety of spellings, names and nicknames.

Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

1. The SURNAME "Sister" is utilized to identify the Sisters at the Sacred Heart Convent.
2. Most persons listed on pages 149 - 151 are officially "inmates" at the State School for Indigent Children (the "Orphans Home").
3. The Soundex Index: This code helps to find SURNAMENES that sound alike. One flaw is that it is based on "English" phonics (i.e., (French or Native American names might not conform.) Another problem occurs for "prefixed" names (other than Mc- and Mac-) since these names may be coded with or without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Soundex Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1900 Federal Census Records (images) is contained in a separate file.
6. Useless 'information' gleaned from the census pages:
 - One household lists a wife and a mistress and many children.
 - One household lists two wives - and many children.
 - One listing indicates a woman as 'head of household' followed by entries for her husband and children.
 - The entries for 'age' and birth 'month & year' often disagree!
