These files contain all of the readable names as extracted from the microfilmed 1910 Federal Census page images for Steele County, Minnesota. The official date of the census was April 15, 1910. In addition to the SURNAME, Census Page, First Name and Age, I have added the Miracode (or Soundex) code corresponding to each SURNAME. The "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will interpret the text differently. The microfilm images are often of low quality. The census taker's penmanship is sometimes very poor (especially so in Owatonna City Wards 2, 3 & 4.) Time was not kind to the written text: the ink was absorbed by the paper yielding a 'fat squiggle' instead of written text and some images indicate paper discoloration (darkening) making the writing often difficult to read.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Some of the census takers also had the (bad) habit of using initials instead of names. Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct spelling mistakes from the data. Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was entirely unreadable.

- Notes: 1. This composite shows entries from the 1880 - 1930 censuses and covers four generations of my family.
 2. The <year> identification appears ONLY in this sample.
 3. Notice the variety of spellings, names and nicknames.

 Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

=====

 Notes

1. The SURNAME "Sister" is utilized to identify the Sisters at the

Sacred Heart Convent.

2. Most persons listed on pages 232B to 234B are officially "inmates" at the State School for Indigent Children (i.e., residents at the "Orphans Home").
3. The Miracode (Soundex) Index: This code number is intended to assist you in finding SURNAMES that sound alike. One flaw with this code is that it is based on "English" phonics - so it may work poorly for French or Native American etc. names. Another problem occurs for those with "prefixed" names (other than Mc- and Mac-) because these names are sometimes coded with and sometimes without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Miracode Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1910 Federal Census Records (images) is contained in a separate file.

=====

These files contain all of the readable names as extracted from the microfilmed 1910 Federal Census page images for Steele County, Minnesota. The official date of the census was April 15, 1910. In addition to the SURNAME, Census Page, First Name and Age, I have added the Miracode (or Soundex) code corresponding to each SURNAME. The "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will interpret the text differently. The microfilm images are often of low quality. The census taker's penmanship is sometimes very poor (especially so in Owatonna City Wards 2, 3 & 4.) Time was not kind to the written text: the ink was absorbed by the paper yielding a 'fat squiggle' instead of written text and some images indicate paper discoloration (darkening) making the writing often difficult to read.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Some of the census takers also had the (bad) habit of using initials instead of names. Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct spelling mistakes from the data. Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was entirely unreadable.

 Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

=====

 Notes

1. The SURNAME "Sister" is utilized to identify the Sisters at the

Sacred Heart Convent.

- 2. Most persons listed on pages 232B to 234B are officially "inmates" at the State School for Indigent Children (i.e., residents at the "Orphans Home").
- 3. The Miracode (Soundex) Index: This code number is intended to assist you in finding SURNAMES that sound alike. One flaw with this code is that it is based on "English" phonics - so it may work poorly for French or Native American etc. names. Another problem occurs for those with "prefixed" names (other than Mc- and Mac-) because these names are sometimes coded with and sometimes without the prefix.
- 4. For those names flagged as only partially readable, an attempt to determine a possible Miracode Index was made. The zero "0" is used to "pad" the index to its proper length.
- 5. A summary of the information contained in the 1910 Federal Census Records (images) is contained in a separate file.

=====

These files contain all of the readable names as extracted from the microfilmed 1910 Federal Census page images for Steele County, Minnesota. The official date of the census was April 15, 1910. In addition to the SURNAME, Census Page, First Name and Age, I have added the Miracode (or Soundex) code corresponding to each SURNAME. The "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will interpret the text differently. The microfilm images are often of low quality. The census taker's penmanship is sometimes very poor (especially so in Owatonna City Wards 2, 3 & 4.) Time was not kind to the written text: the ink was absorbed by the paper yielding a 'fat squiggle' instead of written text and some images indicate paper discoloration (darkening) making the writing often difficult to read.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Some of the census takers also had the (bad) habit of using initials instead of names. Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct spelling mistakes from the data. Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was entirely unreadable.

 3. Notice the variety of spellings, names and nicknames.

 Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

 Notes

1. The SURNAME "Sister" is utilized to identify the Sisters at the

Sacred Heart Convent.

2. Most persons listed on pages 232B to 234B are officially "inmates" at the State School for Indigent Children (i.e., residents at the "Orphans Home").
3. The Miracode (Soundex) Index: This code number is intended to assist you in finding SURNAMES that sound alike. One flaw with this code is that it is based on "English" phonics - so it may work poorly for French or Native American etc. names. Another problem occurs for those with "prefixed" names (other than Mc- and Mac-) because these names are sometimes coded with and sometimes without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Miracode Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1910 Federal Census Records (images) is contained in a separate file.

These files contain all of the readable names as extracted from the microfilmed 1910 Federal Census page images for Steele County, Minnesota. The official date of the census was April 15, 1910. In addition to the SURNAME, Census Page, First Name and Age, I have added the Miracode (or Soundex) code corresponding to each SURNAME. The "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will interpret the text differently. The microfilm images are often of low quality. The census taker's penmanship is sometimes very poor (especially so in Owatonna City Wards 2, 3 & 4.) Time was not kind to the written text: the ink was absorbed by the paper yielding a 'fat squiggle' instead of written text and some images indicate paper discoloration (darkening) making the writing often difficult to read.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Some of the census takers also had the (bad) habit of using initials instead of names. Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct spelling mistakes from the data. Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was entirely unreadable.

 Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

**!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
 !! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!**

=====

 Notes

1. The SURNAME "Sister" is utilized to identify the Sisters at the

Sacred Heart Convent.

2. Most persons listed on pages 232B to 234B are officially "inmates" at the State School for Indigent Children (i.e., residents at the "Orphans Home").
3. The Miracode (Soundex) Index: This code number is intended to assist you in finding SURNAMES that sound alike. One flaw with this code is that it is based on "English" phonics - so it may work poorly for French or Native American etc. names. Another problem occurs for those with "prefixed" names (other than Mc- and Mac-) because these names are sometimes coded with and sometimes without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Miracode Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1910 Federal Census Records (images) is contained in a separate file.

=====

These files contain all of the readable names as extracted from the microfilmed 1910 Federal Census page images for Steele County, Minnesota. The official date of the census was April 15, 1910. In addition to the SURNAME, Census Page, First Name and Age, I have added the Miracode (or Soundex) code corresponding to each SURNAME. The "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will interpret the text differently. The microfilm images are often of low quality. The census taker's penmanship is sometimes very poor (especially so in Owatonna City Wards 2, 3 & 4.) Time was not kind to the written text: the ink was absorbed by the paper yielding a 'fat squiggle' instead of written text and some images indicate paper discoloration (darkening) making the writing often difficult to read.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Some of the census takers also had the (bad) habit of using initials instead of names. Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct spelling mistakes from the data. Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was entirely unreadable.

- 1930 Haberman, H165 189A Kate 50, George 20, Albert 18, Louise 15, Paul 13

- Notes: 1. This composite shows entries from the 1880 - 1930 censuses and covers four generations of my family.
 2. The <year> identification appears ONLY in this sample.
 3. Notice the variety of spellings, names and nicknames.

 Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

**!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
 !! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!**

=====

 Notes

1. The SURNAME "Sister" is utilized to identify the Sisters at the

Sacred Heart Convent.

2. Most persons listed on pages 232B to 234B are officially "inmates" at the State School for Indigent Children (i.e., residents at the "Orphans Home").
3. The Miracode (Soundex) Index: This code number is intended to assist you in finding SURNAMES that sound alike. One flaw with this code is that it is based on "English" phonics - so it may work poorly for French or Native American etc. names. Another problem occurs for those with "prefixed" names (other than Mc- and Mac-) because these names are sometimes coded with and sometimes without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Miracode Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1910 Federal Census Records (images) is contained in a separate file.

=====

These files contain all of the readable names as extracted from the microfilmed 1910 Federal Census page images for Steele County, Minnesota. The official date of the census was April 15, 1910. In addition to the SURNAME, Census Page, First Name and Age, I have added the Miracode (or Soundex) code corresponding to each SURNAME. The "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will interpret the text differently. The microfilm images are often of low quality. The census taker's penmanship is sometimes very poor (especially so in Owatonna City Wards 2, 3 & 4.) Time was not kind to the written text: the ink was absorbed by the paper yielding a 'fat squiggle' instead of written text and some images indicate paper discoloration (darkening) making the writing often difficult to read.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Some of the census takers also had the (bad) habit of using initials instead of names. Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct spelling mistakes from the data. Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was entirely unreadable.

 Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

=====

 Notes

1. The SURNAME "Sister" is utilized to identify the Sisters at the

Sacred Heart Convent.

2. Most persons listed on pages 232B to 234B are officially "inmates" at the State School for Indigent Children (i.e., residents at the "Orphans Home").
3. The Miracode (Soundex) Index: This code number is intended to assist you in finding SURNAMES that sound alike. One flaw with this code is that it is based on "English" phonics - so it may work poorly for French or Native American etc. names. Another problem occurs for those with "prefixed" names (other than Mc- and Mac-) because these names are sometimes coded with and sometimes without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Miracode Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1910 Federal Census Records (images) is contained in a separate file.

=====

These files contain all of the readable names as extracted from the microfilmed 1910 Federal Census page images for Steele County, Minnesota. The official date of the census was April 15, 1910. In addition to the SURNAME, Census Page, First Name and Age, I have added the Miracode (or Soundex) code corresponding to each SURNAME. The "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will interpret the text differently. The microfilm images are often of low quality. The census taker's penmanship is sometimes very poor (especially so in Owatonna City Wards 2, 3 & 4.) Time was not kind to the written text: the ink was absorbed by the paper yielding a 'fat squiggle' instead of written text and some images indicate paper discoloration (darkening) making the writing often difficult to read.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Some of the census takers also had the (bad) habit of using initials instead of names. Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct spelling mistakes from the data. Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was entirely unreadable.

- Notes: 1. This composite shows entries from the 1880 - 1930 censuses and covers four generations of my family.
 2. The <year> identification appears ONLY in this sample.
 3. Notice the variety of spellings, names and nicknames.

 Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
!! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!

=====

 Notes

1. The SURNAME "Sister" is utilized to identify the Sisters at the

Sacred Heart Convent.

2. Most persons listed on pages 232B to 234B are officially "inmates" at the State School for Indigent Children (i.e., residents at the "Orphans Home").
3. The Miracode (Soundex) Index: This code number is intended to assist you in finding SURNAMES that sound alike. One flaw with this code is that it is based on "English" phonics - so it may work poorly for French or Native American etc. names. Another problem occurs for those with "prefixed" names (other than Mc- and Mac-) because these names are sometimes coded with and sometimes without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Miracode Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1910 Federal Census Records (images) is contained in a separate file.

These files contain all of the readable names as extracted from the microfilmed 1910 Federal Census page images for Steele County, Minnesota. The official date of the census was April 15, 1910. In addition to the SURNAME, Census Page, First Name and Age, I have added the Miracode (or Soundex) code corresponding to each SURNAME. The "Enumeration District" Table, below, allows you to associate a census page with a township, city or village.

These files represent my best efforts at interpreting the text from the images. Others reviewing the images will interpret the text differently. The microfilm images are often of low quality. The census taker's penmanship is sometimes very poor (especially so in Owatonna City Wards 2, 3 & 4.) Time was not kind to the written text: the ink was absorbed by the paper yielding a 'fat squiggle' instead of written text and some images indicate paper discoloration (darkening) making the writing often difficult to read.

The SURNAMES are ordered alphabetically. I have chosen to use a "family friendly" format that preserves much of the family information from the census listings.

If you don't find the person(s) you seek, be very creative with alternate spellings and possible misspellings. The spelling of the census takers was often "creative". They generally spelled the names "as they heard them" (i.e., phonetically). Some of the census takers also had the (bad) habit of using initials instead of names. Reading the images was sometimes difficult but especially so when poor penmanship is combined with strings of "m", "n", "u", "w", "e", "i", "r", "s", etc. letters. (My experiences interpreting the census images suggest that a given person's name will have an alternate spelling about 25% of the time.)

I made few attempts to correct spelling mistakes from the data. Occasionally I made an "educated guess" about a name. In other cases I "flagged" names as partially unreadable. In a few instances the SURNAME was entirely unreadable.

- Notes: 1. This composite shows entries from the 1880 - 1930 censuses and covers four generations of my family.
 2. The <year> identification appears ONLY in this sample.
 3. Notice the variety of spellings, names and nicknames.

 Explanation for Special Notations appearing in the listings

- * indicates multiple letters as unreadable
- ~ indicates one letter as unreadable
- ? indicates that the previous letter is uncertain
- or -- indicates no entry in that column
- (?) indicates that the name is an 'educated' guess
- (F) indicates a Female Person but an unreadable name
- (M) indicates a Male Person but an unreadable name
- m# indicates an age in months (for children younger than 1)
- d# indicates an age in days (for children younger than 1 month)

=====

This format, called "Family Friendly", evolved as a way to maintain some of the family relationship information from the census listings. Each new entry in the "Surname" column results from any of the following factors:

1. A new "household" marked in the census
2. A new "family" marked in the census
3. A new Surname occurring in the census
4. A 'continued' listing appearing on a new page

For each new "Surname" entry, a Soundex Code is also shown. That person marked as "Head" of the household is named first. Others listed on the same line, or continuing line(s), include those listed as wife, husband, son, daughter, and others sharing the same surname. Sometimes family members are not listed on the same page as the household "Head". This causes the sort routine to generate a new line and "Surname" entry. I have forced the routine to place these cases immediately following the line containing the "Head" of the household. A review of the ages usually suggests that this has happened.

This format fails to show family and household relationship information for:

1. in-laws
2. married daughters and their family
3. the wife's parents and siblings
4. step children
5. adopted children
6. siblings at the State School (Orphan Home)

**!! IF YOU HAVE ANY DOUBTS ABOUT POSSIBLE FAMILY RELATIONSHIPS, !!
 !! YOU MUST OBTAIN AND CAREFULLY EXAMINE THE CENSUS IMAGES! !!**

=====

 Notes

1. The SURNAME "Sister" is utilized to identify the Sisters at the

Sacred Heart Convent.

2. Most persons listed on pages 232B to 234B are officially "inmates" at the State School for Indigent Children (i.e., residents at the "Orphans Home").
3. The Miracode (Soundex) Index: This code number is intended to assist you in finding SURNAMES that sound alike. One flaw with this code is that it is based on "English" phonics - so it may work poorly for French or Native American etc. names. Another problem occurs for those with "prefixed" names (other than Mc- and Mac-) because these names are sometimes coded with and sometimes without the prefix.
4. For those names flagged as only partially readable, an attempt to determine a possible Miracode Index was made. The zero "0" is used to "pad" the index to its proper length.
5. A summary of the information contained in the 1910 Federal Census Records (images) is contained in a separate file.
